DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 38,43 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant was silent in regards to the doping of the substrate, applicant never stated that the substrate was either p-type or n-type or insulating.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claim 36-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant has failed to give an adequate description of what applicant considers a "bulk semiconductor region" as recited in claims 36-45. It is unclear whether applicant means the sheath like structure (see e.g. item 8 or the semiconducting polymer item 50).

For the sake of compact prosecution bulk semiconductor is interpreted as the sheath like structure item 8.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 36-45 are rejected under 35 U.S.C. 102(b) as being anticipated by Yazawa.

a. As to claims 36-37,39,40,41,42,44, and 45, Yazawa teaches nanoengineered structure, comprising: a crystalline semiconductor nanowhisker of III-V material (see fig. 1 item 1) of a first conductivity type (wherein applicant has admitted that GaAs is intrinsically p-type); and an enclosure comprising a bulk semiconductor region of a second conductivity type opposite to the first conductivity type enclosing on the sides and in contact with said nanowhisker along at least part of its length (see item 6); wherein a combination of the nanowhisker and the bulk semiconductor region forms a pn junction (see fig. 2 and Embodiment 1). Wherein the bulk material is different from the core (see embodiment 1 and fig 2).

- b. As to claim 38,43 Yazawa teaches the nanoelement is up standing on a doped substrate (see fig. 1 and 8 and Embodiment 1)

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
